MODULAR

BELT SYSTEM

The BELT SYSTEM serves as the basic element. Via the 4-Point-System the BIKE CARRYING SYSTEM is attached in seconds. The BELT SYSTEM is size adjustable in S/M/L. Further accessories can be attached via the loop-in system. The ergonomic hip belt can be adjusted and there is a pocket on the right side.

+

PACK 23L

The PACK 23L offers a storage space of 23 liters. Via the 4-Point-System it can be attached directly to the BELT SYSTEM or other OUTENTIC carrying systems (e.g. the BIKE CARRYING SYSTEM) in seconds.

MOUNTAINBIKER 23L

MOUNTAINBIKER 23L. The MOUNTAINBIKER 23L is the perfect companion for every adventure with the bike.

MODULAR. The BELT SYSTEM is the base. Via a trigger, the PACK 23L can be removed in a few seconds. Every OUTENTIC carrying system (CHILD CARRIER, BIKE CARRYING SYSTEM) can be attached, because every OUTENTIC product is modular.

ERGONOMIC. The shoulder straps and the hip belt are designed to give you the highest comfort during your bike adventure. The force is optimally transferred to the hips and the shoulder straps are size adjustable to S/M/L. The hip belt fits perfectly so that the backpack has a firm hold.

SUITCASE LOADING. Optimal packing functions via the suitcase loading or via the zipper on top.

H2O. The device for drinking bubbles is attached for different models.

HELMET NET. The helmet net is located in a specially designed compartment. The net is stretched over loops when needed.

MADE IN MUNICH. The entire production takes place in and 5 hours around Munich.
